

Green Earth Cruiser instructions

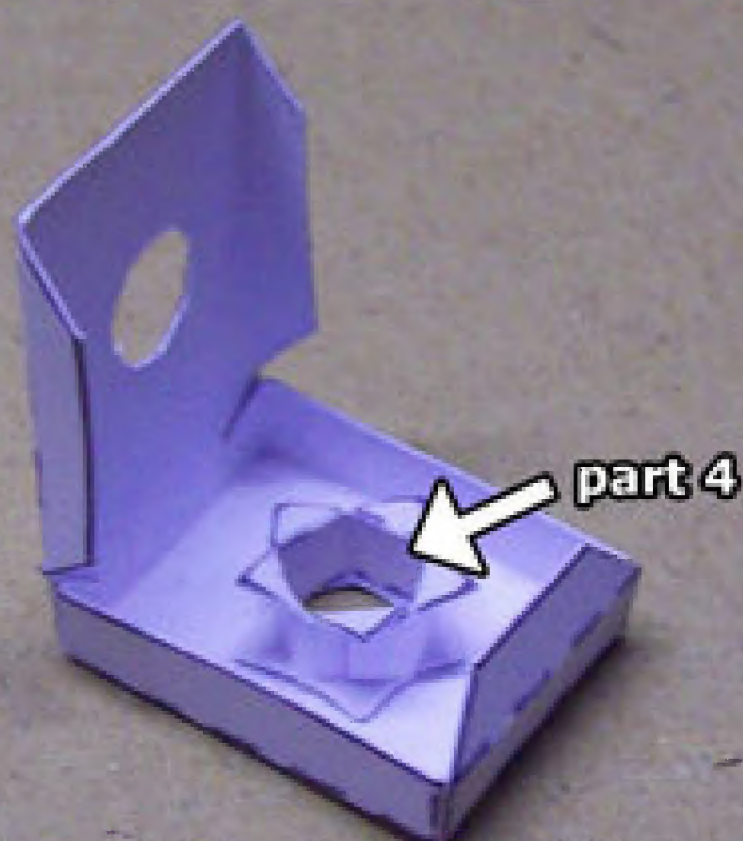

step 1

step 2

step 3

Cut out and assemble part 3 (don't forget the holes!) but before closing it, glue part 4 into a ring and glue it inside as shown here.

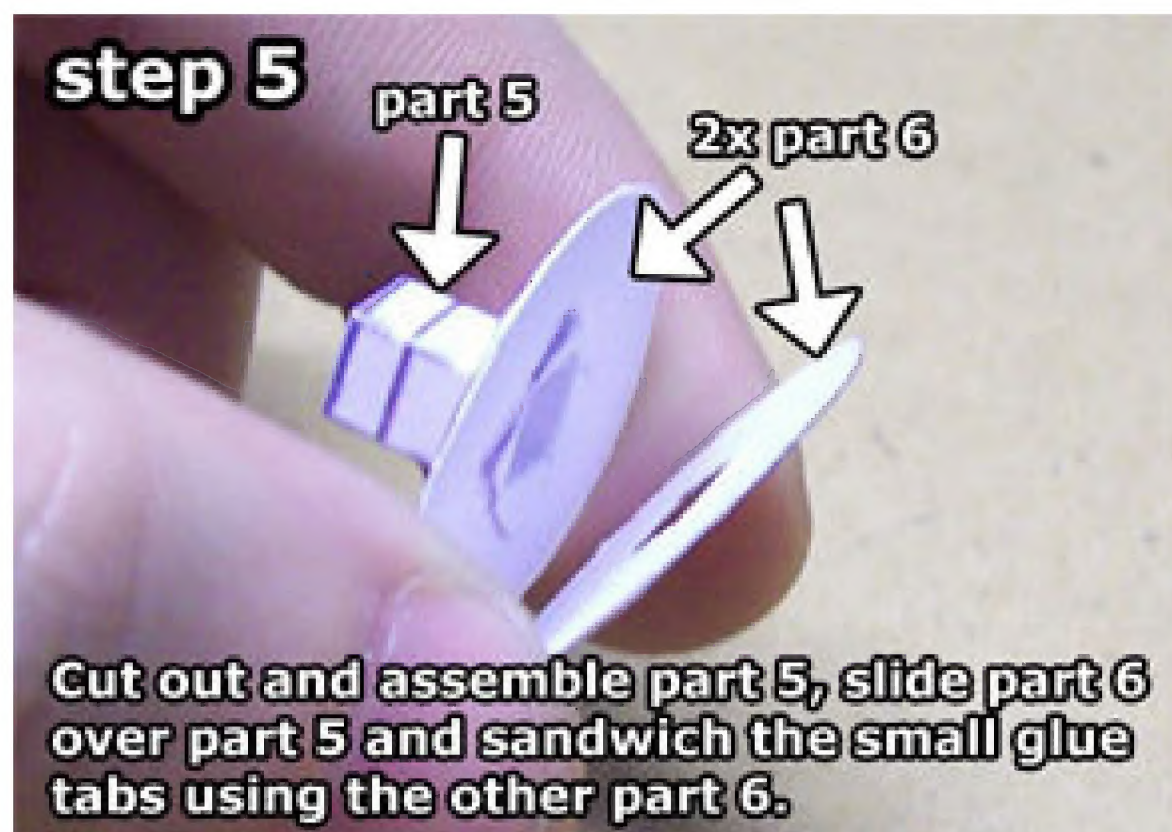

step 4

Close the box and glue it underneath the holes on parts 1 and 2 as shown here.

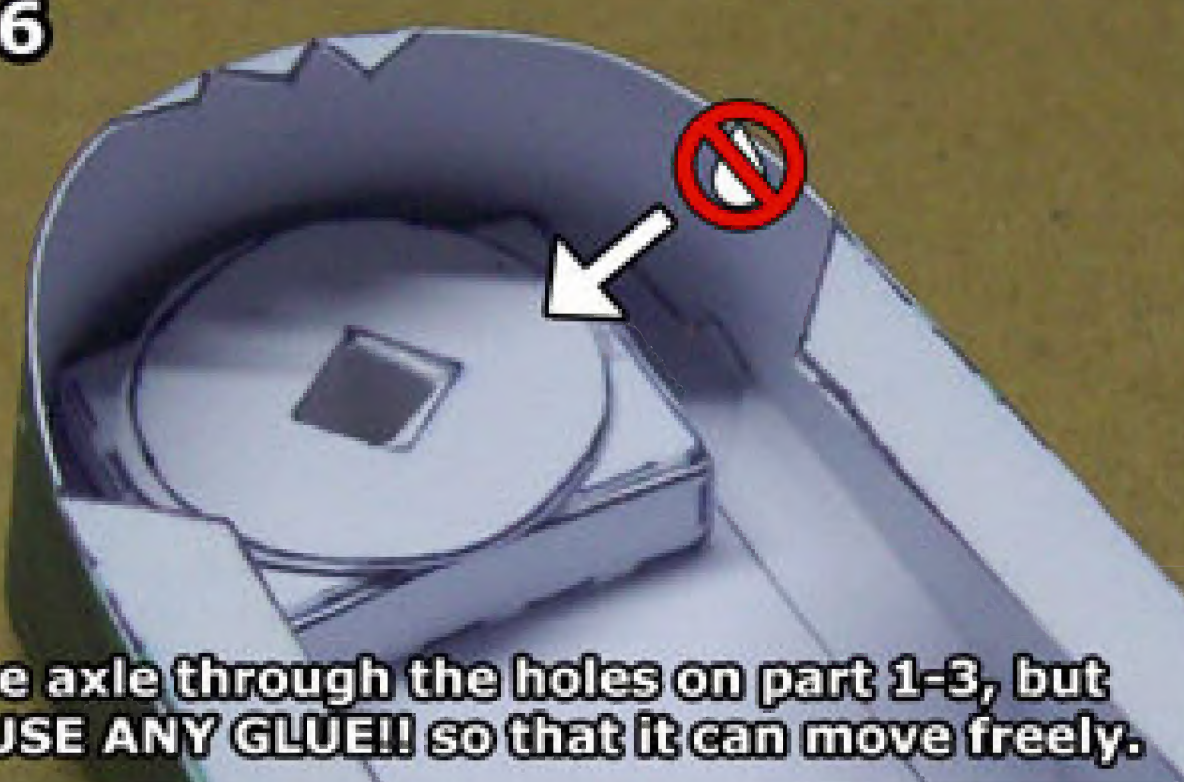

step 5

part 5
2x part 6

Cut out and assemble part 5, slide part 6 over part 5 and sandwich the small glue tabs using the other part 6.

step 6

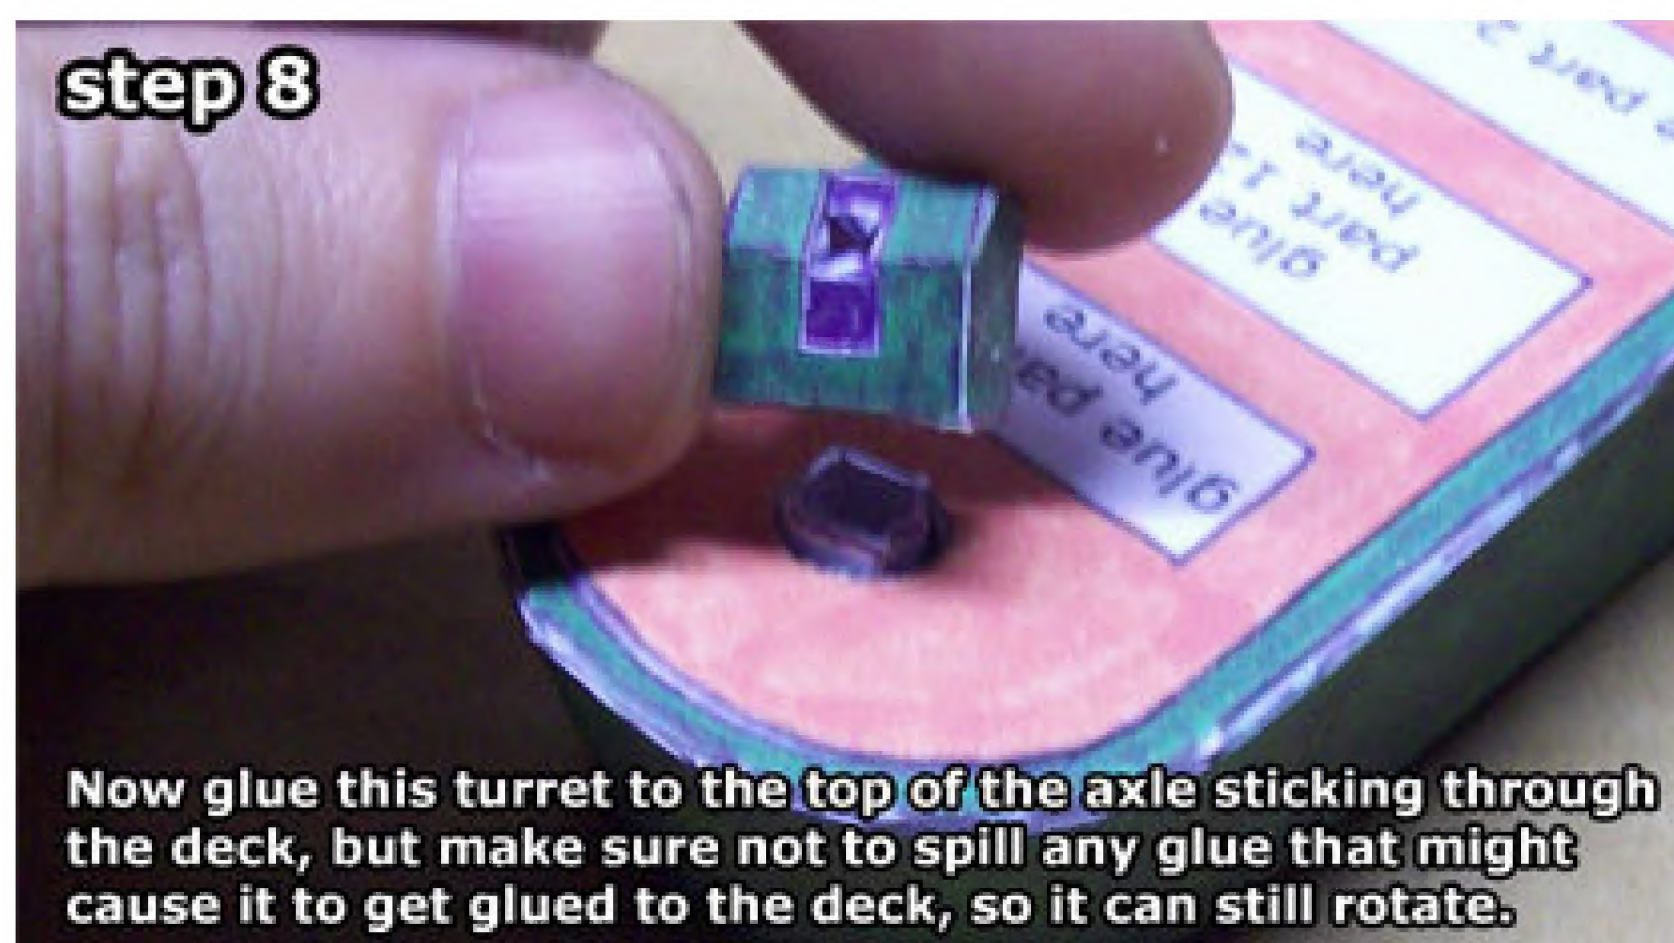

Push the axle through the holes on part 1-3, but **DON'T USE ANY GLUE!!** so that it can move freely.

step 7

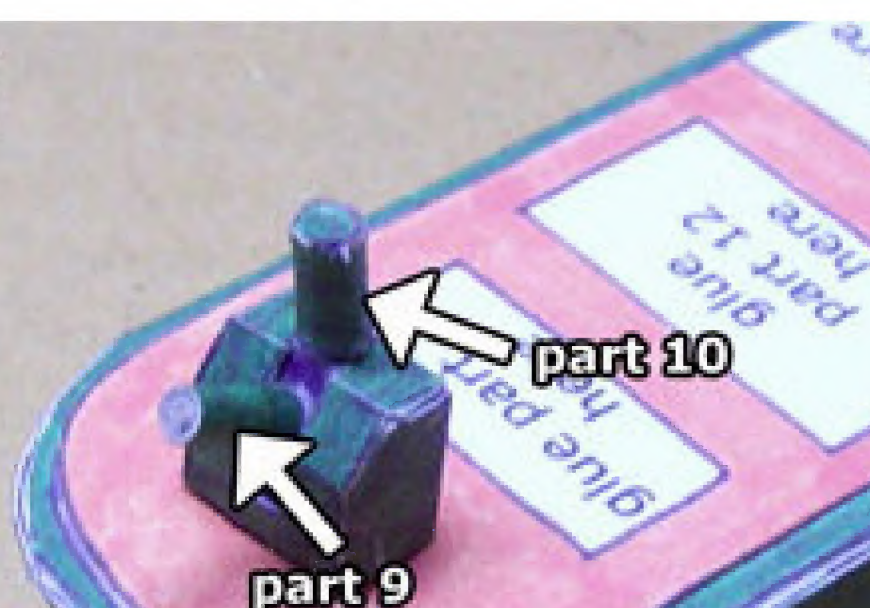

Cut out the rectangular hole on part 7, and before closing it completely, glue part 8 behind it.

step 8

Now glue this turret to the top of the axle sticking through the deck, but make sure not to spill any glue that might cause it to get glued to the deck, so it can still rotate.

step 9

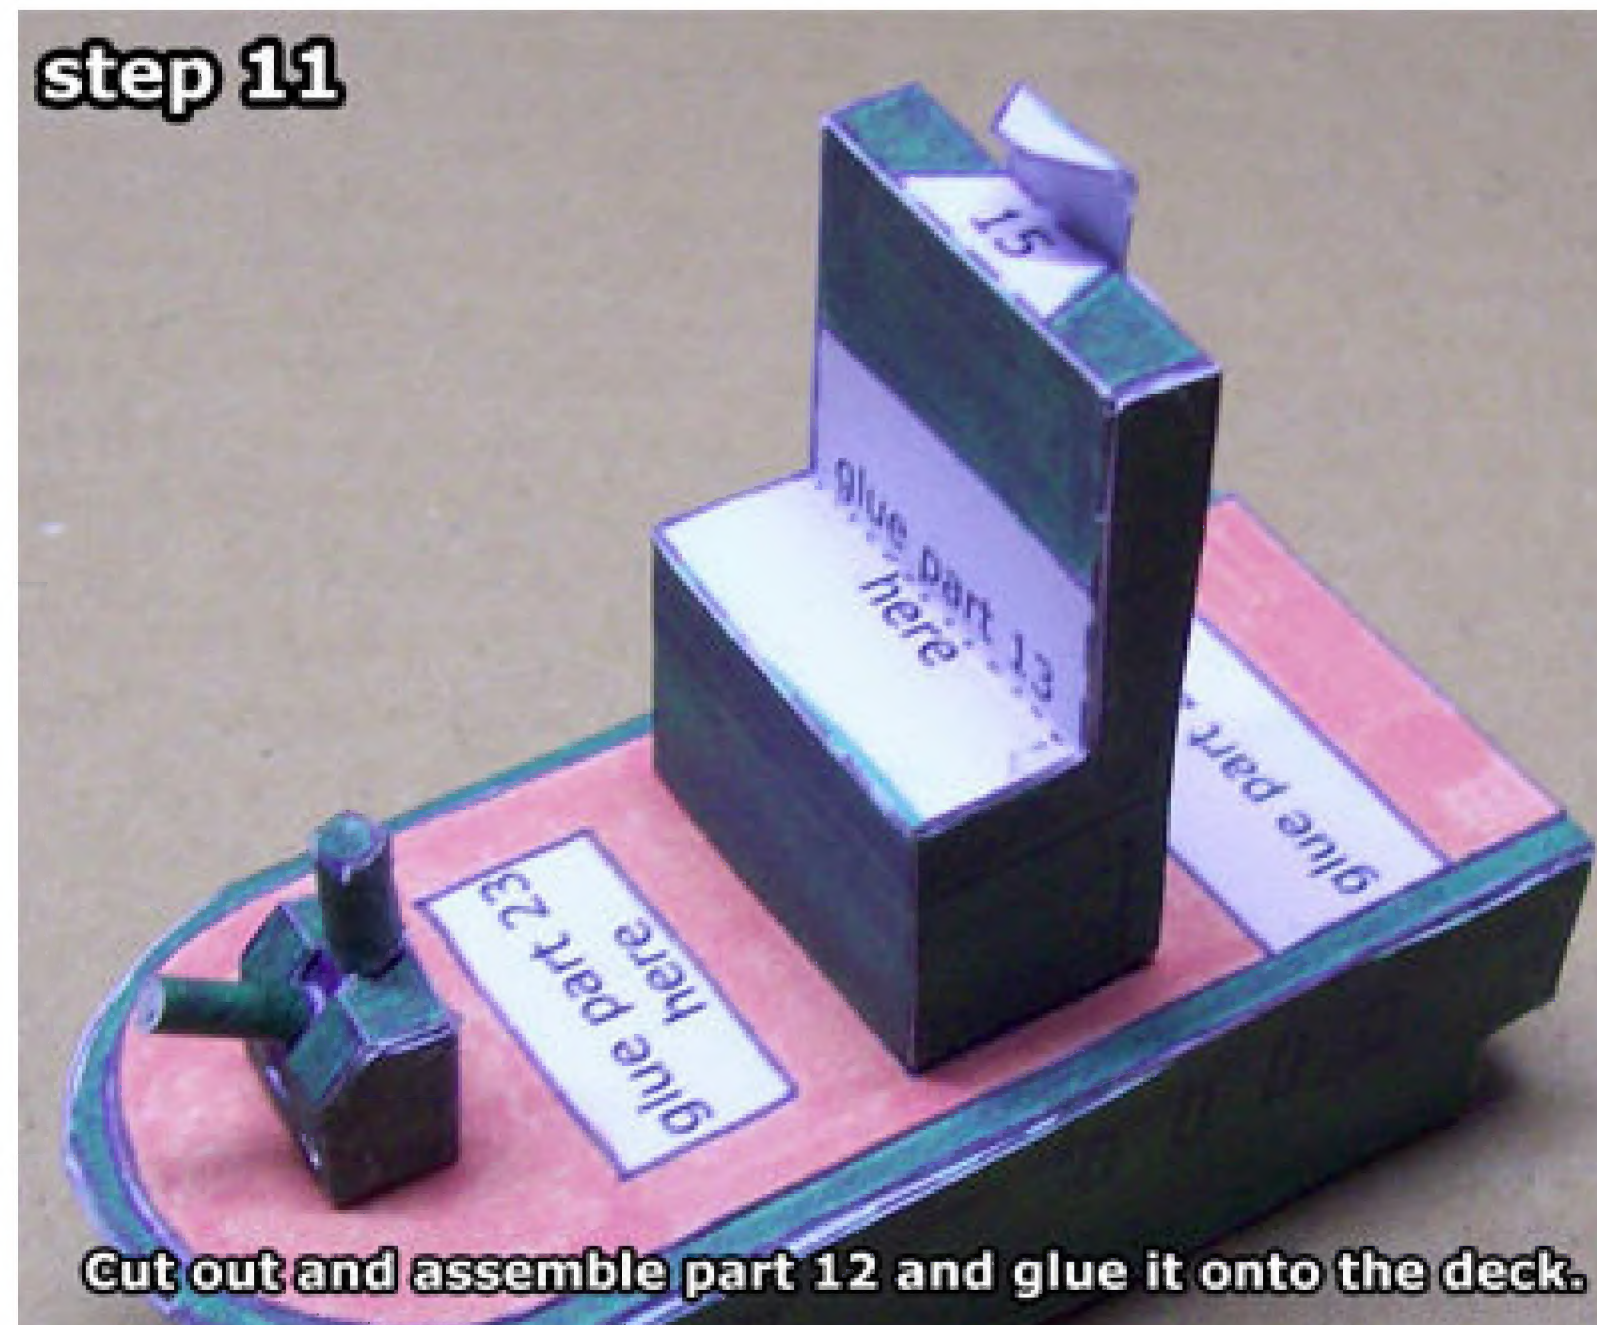

Roll up part 9 as tight as you can and glue it in the hole on part 8, and assemble part 10 and glue it on top of the turret.

step 10

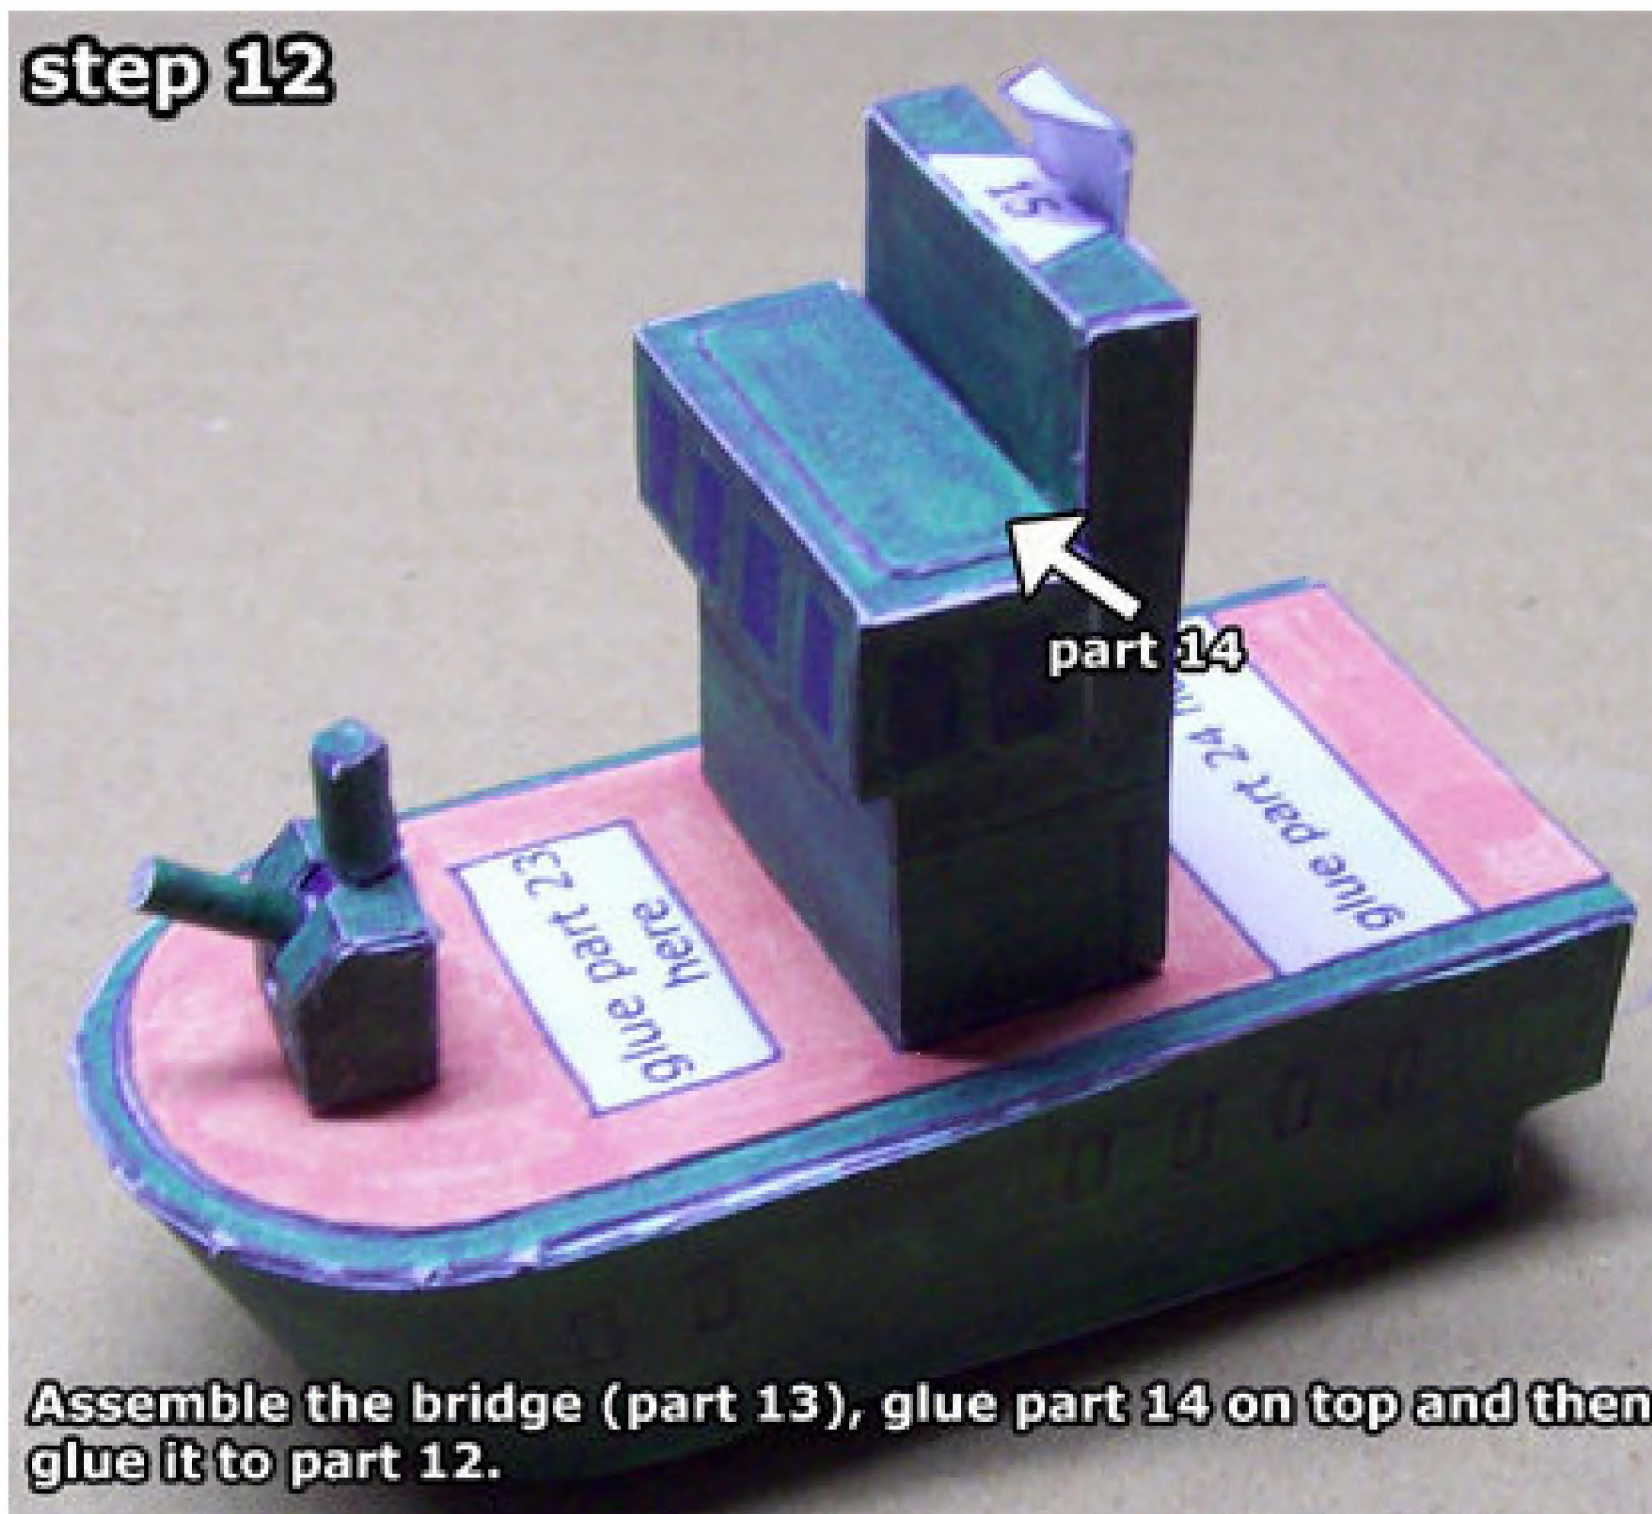

After you make sure the turret is glued properly in place (and can still rotate freely) you can close the bottom with part 11.

step 11

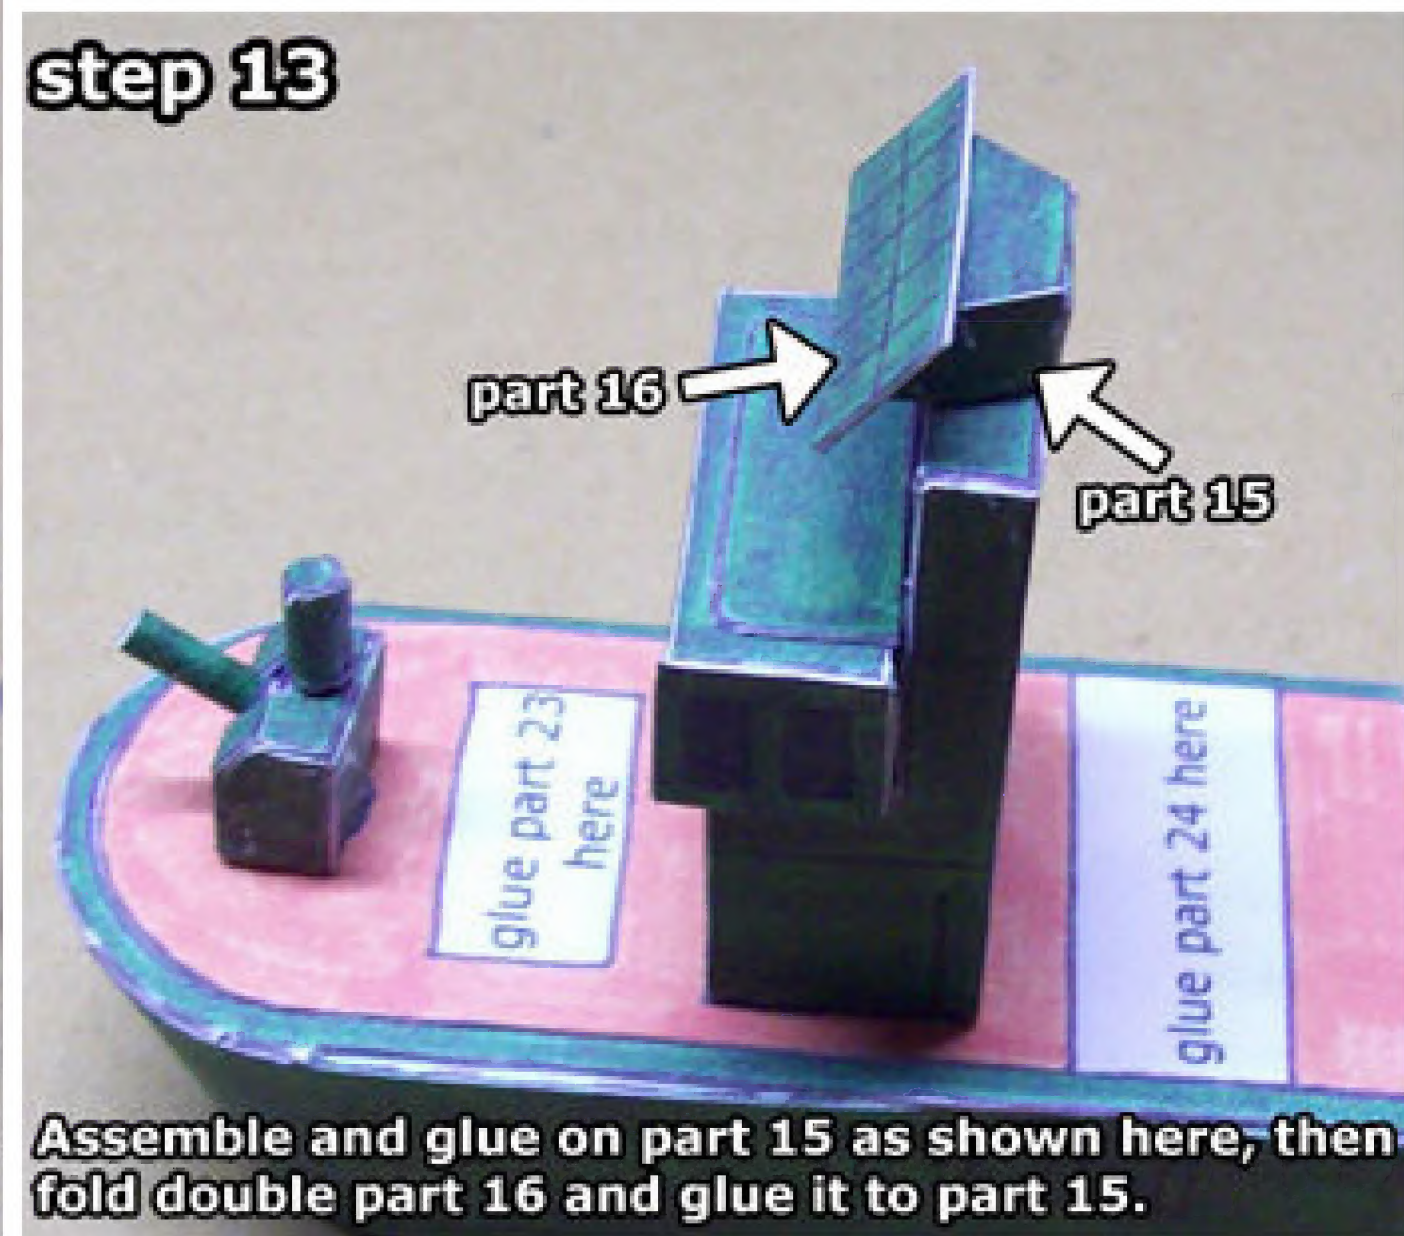

Cut out and assemble part 12 and glue it onto the deck.

step 12

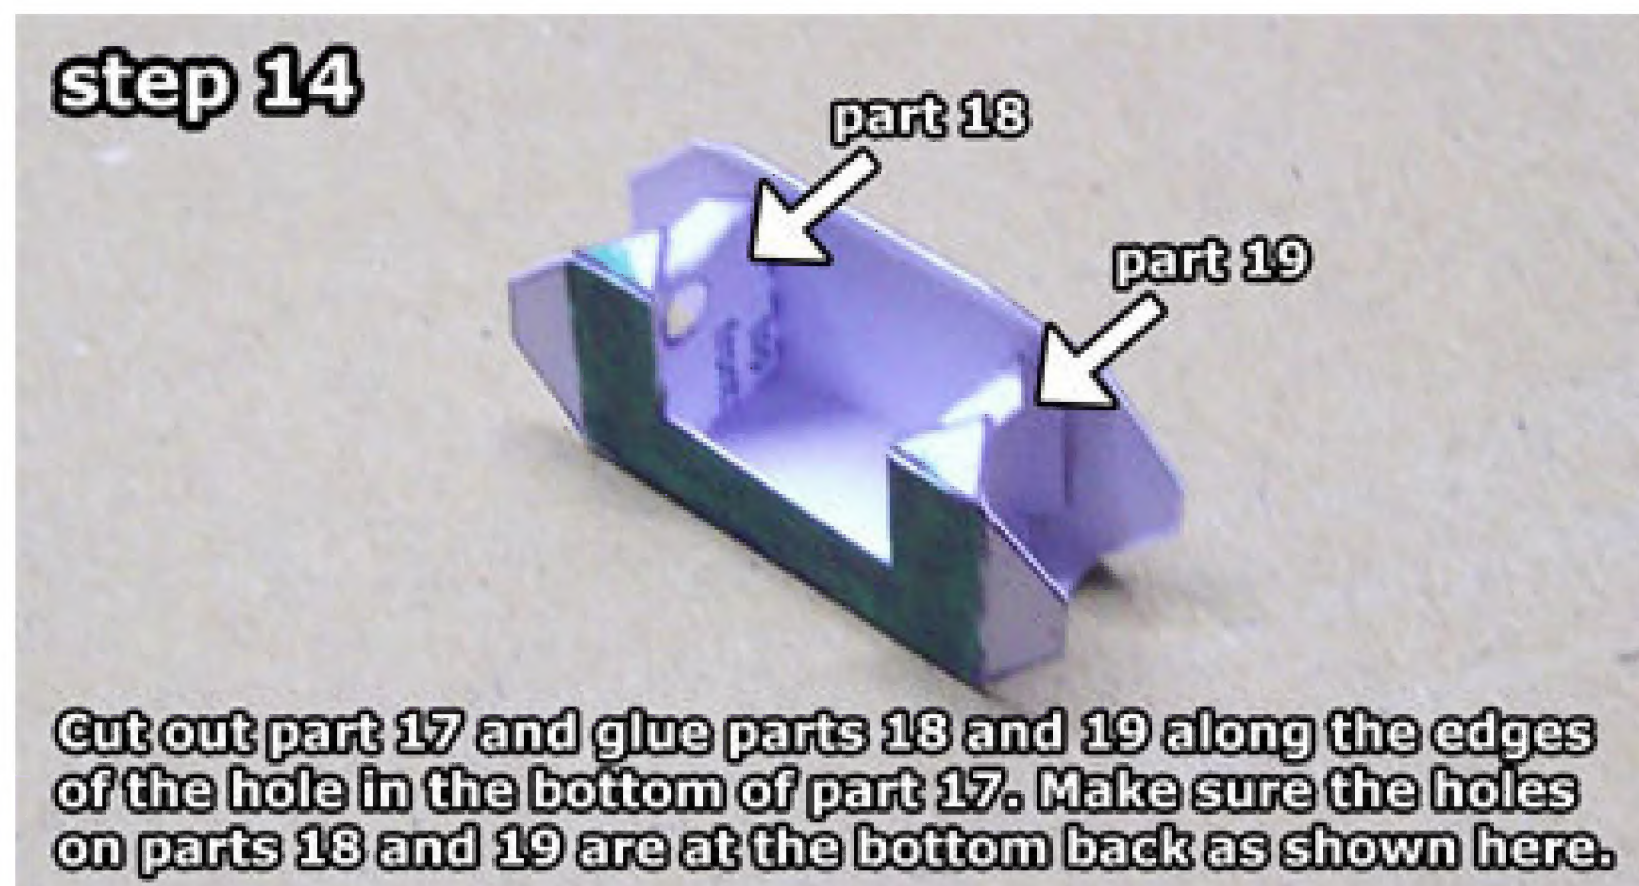

Assemble the bridge (part 13), glue part 14 on top and then glue it to part 12.

step 13

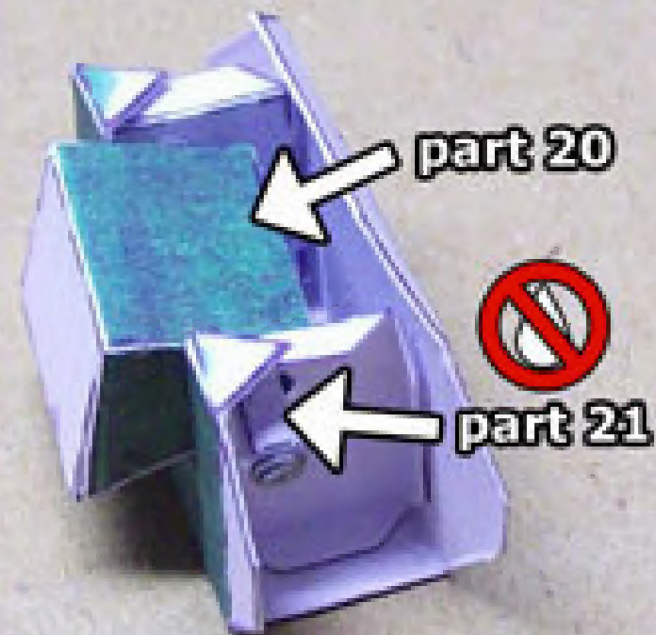

Assemble and glue on part 15 as shown here, then fold double part 16 and glue it to part 15.

step 14

Cut out part 17 and glue parts 18 and 19 along the edges of the hole in the bottom of part 17. Make sure the holes on parts 18 and 19 are at the bottom back as shown here.

step 15

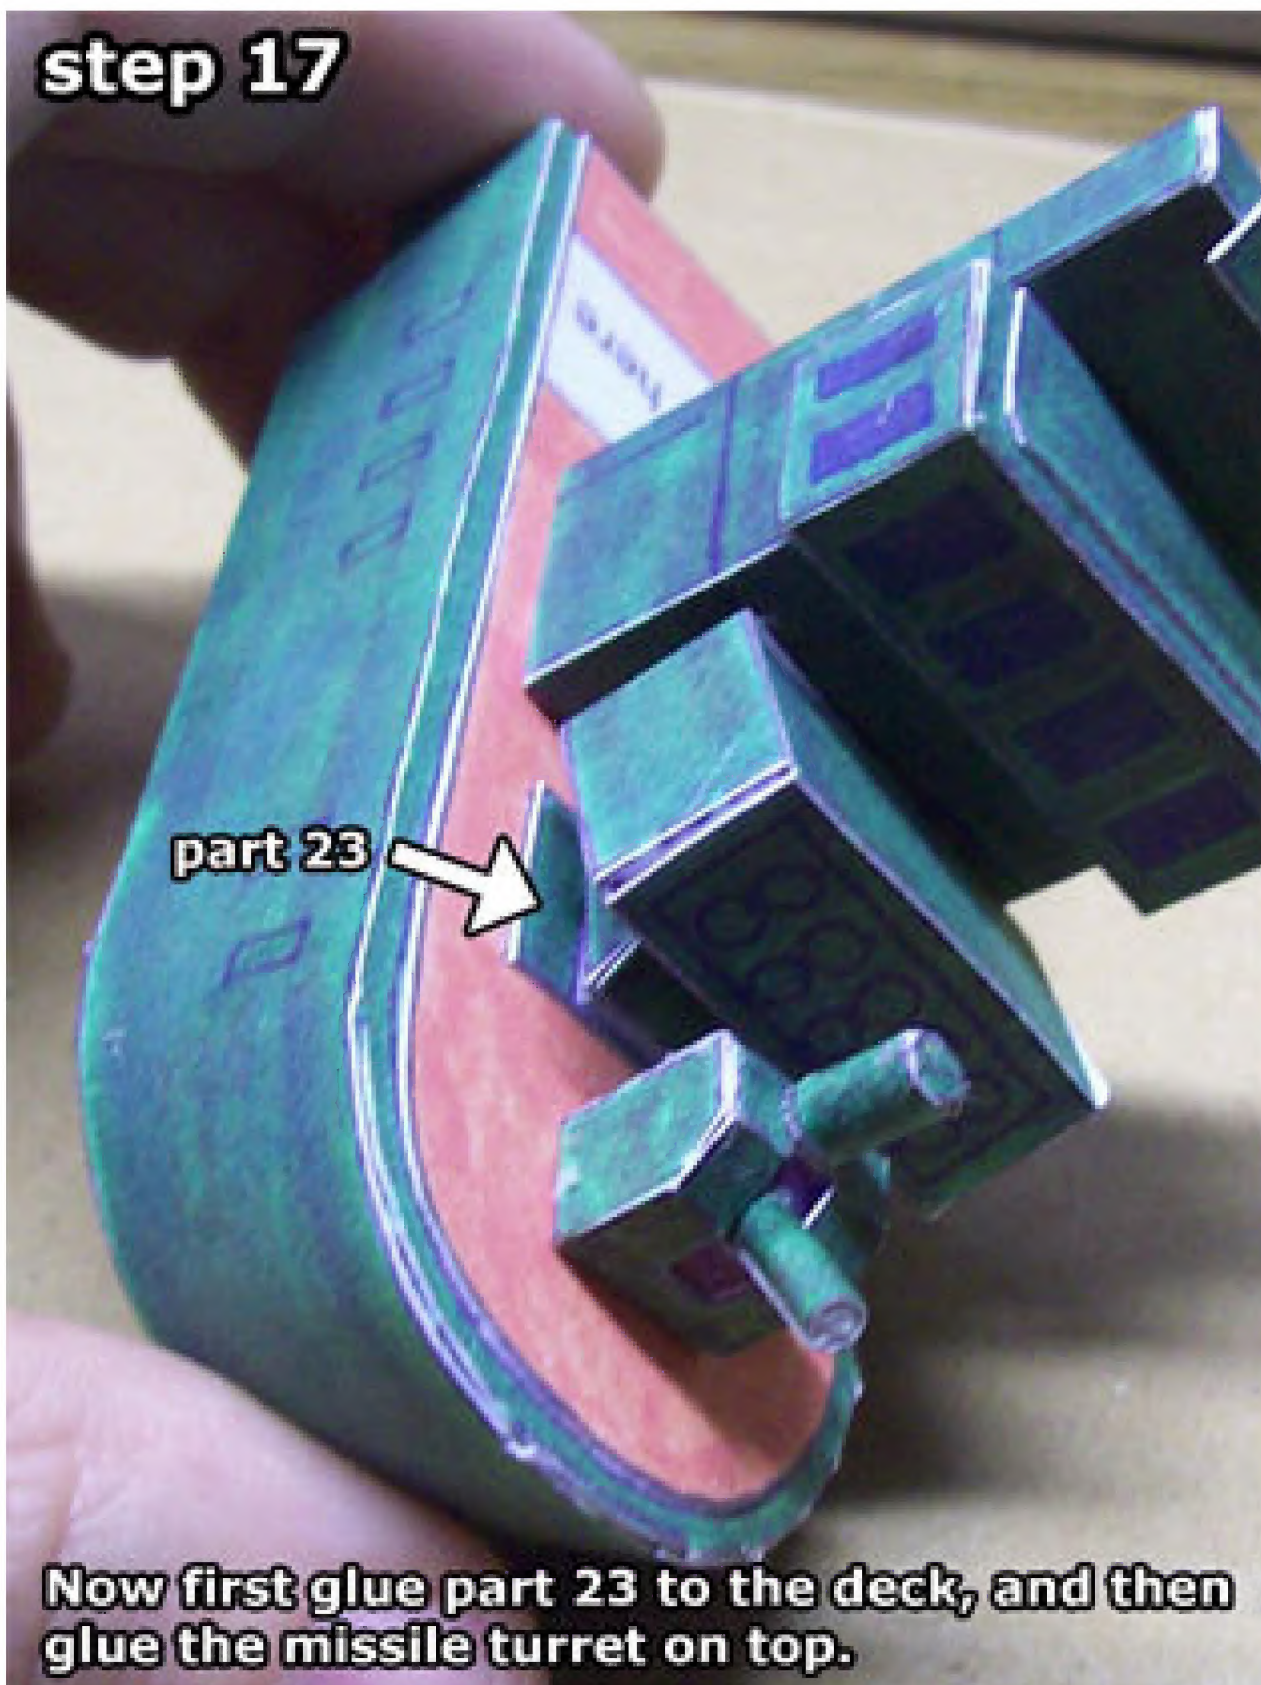

Cut out and assemble part 20 and align the holes, then roll up part 21 as tight as you can and push it through the holes (DON'T USE ANY GLUE FOR THIS!).

step 16

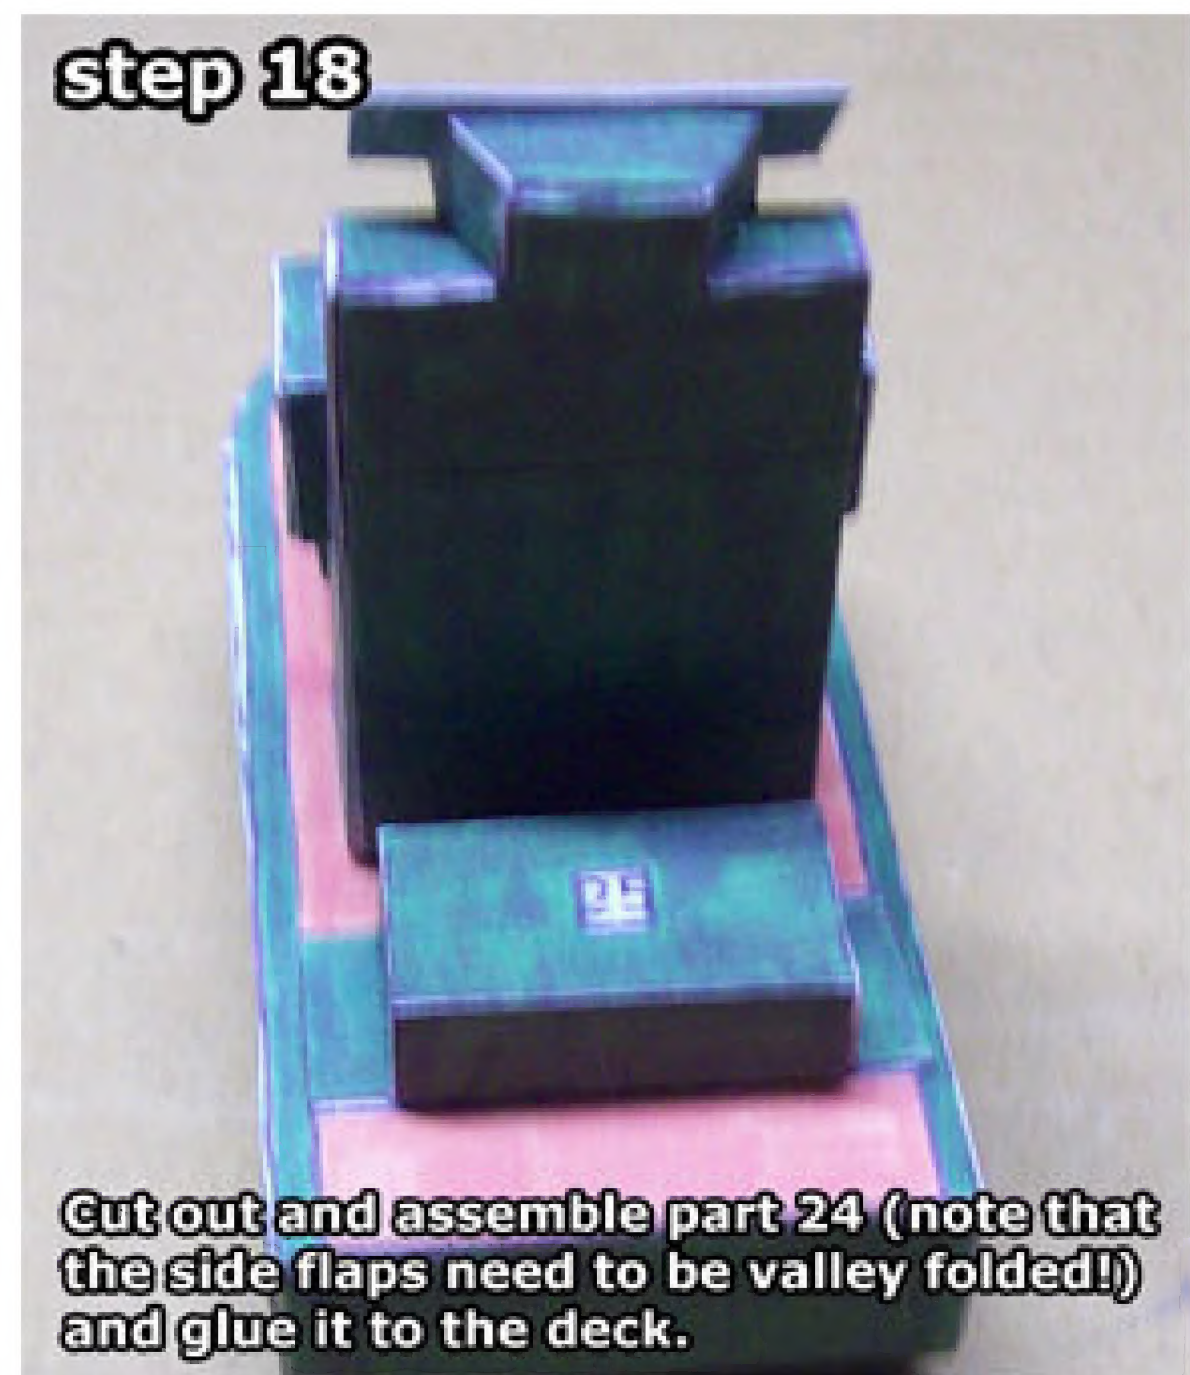

Now close the back and sides using part 22.

step 17

Now first glue part 23 to the deck, and then glue the missile turret on top.

step 18

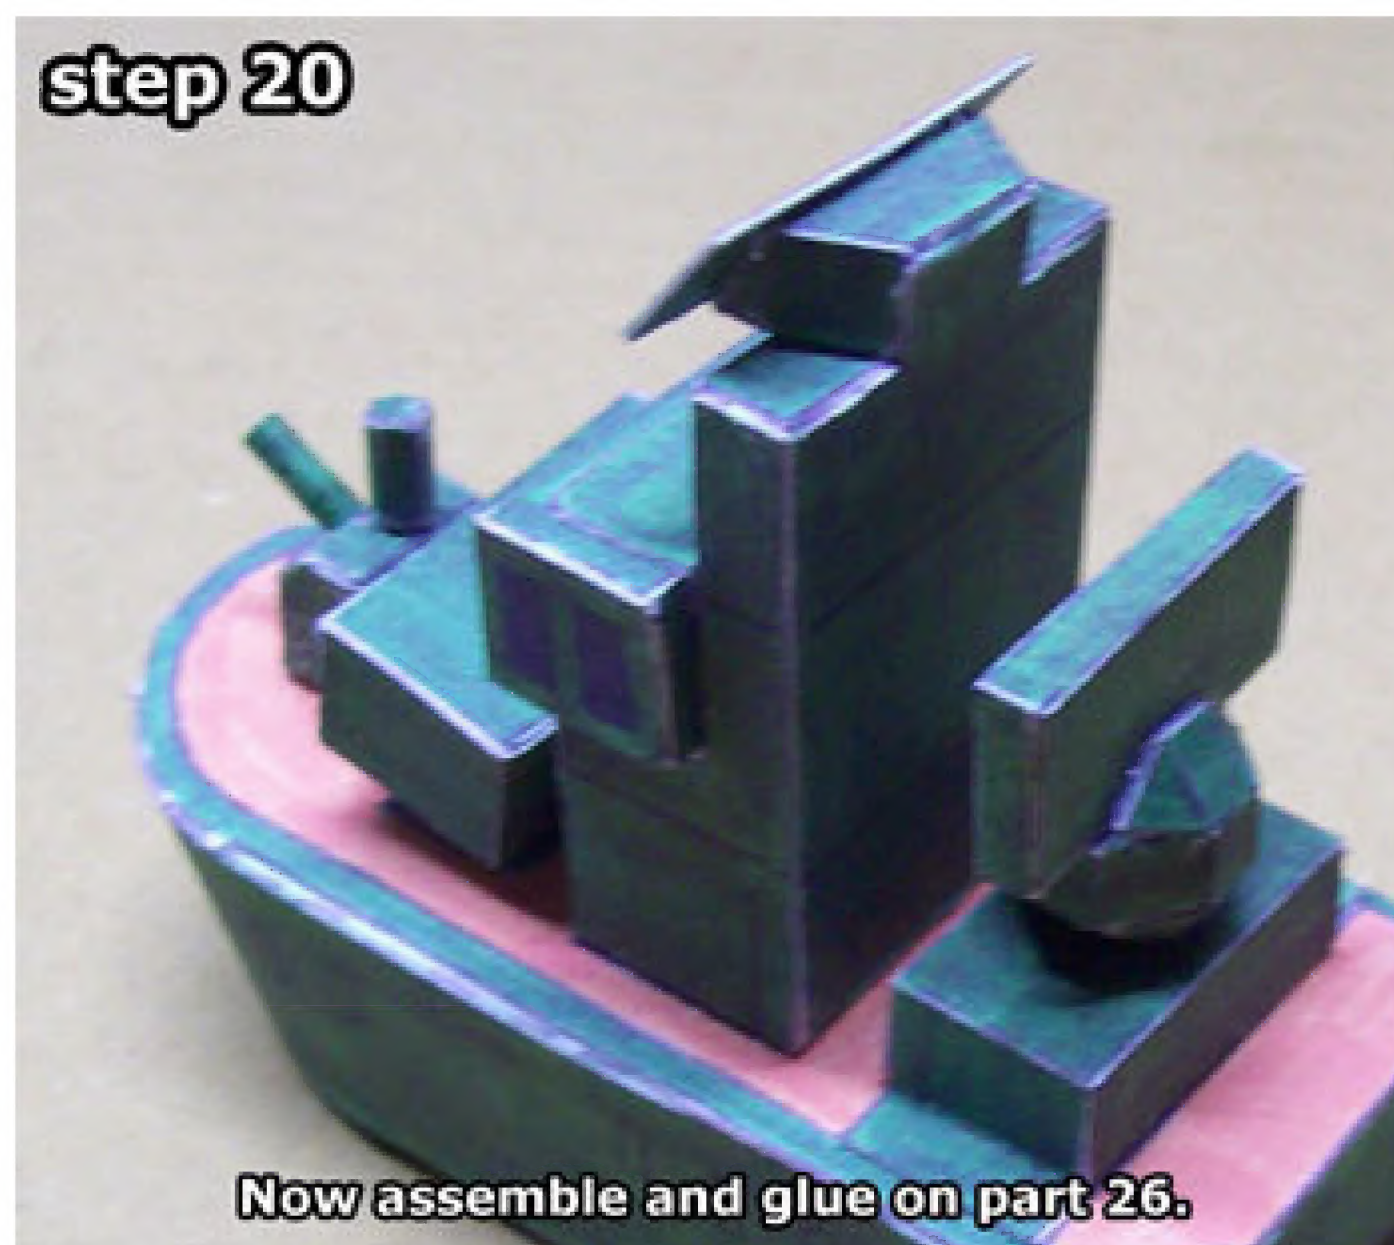

Cut out and assemble part 24 (note that the side flaps need to be valley folded!) and glue it to the deck.

step 19

Part 25 might look intimidating at first, but if you score all the folds properly and take your time, it's not that hard. Glue it on top of part 24.

step 20

Now assemble and glue on part 26.

step 21

Thank you for downloading and building a Ninjatoes' papercraft model!!!
